# All in one

## SpeechExec Pro 10

Philips SpeechExec Pro dictation and transcription software links authors and transcriptionists. It facilitates communication, individual workflow settings and organizational flexibility. Receive written text documents quickly. All you have to do is record your voice and send the files to SpeechExec.

# Xtremely efficient

Philips SpeechExec Pro helps you focus on the essentials. Save time and resources by easily managing and monitoring your dictation workflow with our sophisticated software. Automatic routing of recordings and resulting written documents ensures quicker turnaround times.

# Xtremely fast

Receive written transcriptions even quicker than before, no matter if you are in the office, or on the go. Whether you wish to transcribe your recordings by your personal assistant, our Philips speech recognition or SpeechLive transcription services, you will save valuable time.

# Xtremely secure

Data security is more important today, than ever before. Philips SpeechExec Pro provides highly secure, state of the art file encryption and secure data transfer. Your files are kept safe and are automatically backed up in regular intervals.

# Streamline your workflow and save time

Philips SpeechExec Pro optimizes the information exchange in your daily dictation workflow. It's as easy as one, two, three.

**1**  
Record and send  
your files to  
SpeechExec Pro

**2**  
Choose your  
transcription  
option

**3**  
Receive your  
finished  
document

## When your voice becomes text

Philips SpeechExec Pro connects authors and transcribers, facilitating an easier and more efficient speech to text process. Record your voice using a Philips dictation device such as SpeechAir, Pocket Memo, SpeechMike or the

Philips dictation app for smartphones and send it directly off for transcription. The software automatically routes your dictations to your desired transcription option. You can choose between your assistant, speech recognition or Philips SpeechLive transcription services to type the documents up for you. No need for additional explanatory emails between authors and transcribers. Transcribers receive notifications

of new tasks and authors immediately see when recordings have been transcribed. SpeechExec Pro comes in two versions. One comes with the added benefit of integrated speech recognition (PSE4000 series), allowing you to transcribe urgent dictations immediately, even when your assistant is not available. SpeechExec Pro is the perfect companion for the SpeechMike Premium dictation microphone. With a SpeechMike, you

can dictate directly into the software, and see the speech recognition results appear on your screen. Complete dictations from mobile dictation devices such as the Philips PocketMemo can also easily be loaded into the speech recognition software queue, and will be transcribed in full within seconds. Finished documents can be automatically sent back directly to the author, even when they are on the go.

integrated speech recognition

## Professional solution for the legal industry

Philips SpeechExec Pro is perfect for law firms, corporate legal departments and courts. Legal professionals have to handle large amounts of correspondence and documentation. The software helps them meet their tight deadlines by streamlining their documentation process.

Data security is paramount in the legal sector. Client data has to be kept strictly confidential at all times. SpeechExec Pro meets these needs by offering double file encryption and automatic data backup.

” **The secretarial dictation software allows us to maximize their time by outsourcing routine dictation files for transcription, allowing secretaries to free up typing time to do more pressing and taxing administrative tasks.**

– Alison Hoy, Chief Executive, Berry Smith LLP

# doctor

## Professional solution for the healthcare industry

Philips SpeechExec Pro is a tailor-made solution for healthcare professionals both in public hospitals and private medical practices. As speaking is up to seven times quicker than typing, recording patient's reports can be done a lot more efficiently now. The software works seamlessly with existing clinical software and hospital information systems. It meets the needs of busy healthcare professionals by allowing them to focus more on their patients instead of typing up patients' reports.

“ **Our dictation management system is very much appreciated by medical practitioners. Once a report is recorded, the data is automatically loaded into the software, ready to be transcribed.**

– Sylvie Desauois, Director of the Saint-Quentin Hospital Center information systems

\* For best results with healthcare-specific speech recognition vocabulary, Dragon Medical Practice Edition can be purchased additionally.

## Professional solution for business professionals

Whether you work in finance, insurance, real-estate, as an architect, journalist or sales representative, SpeechExec Pro helps you get more done in less time. Reports can be dictated on the go and sent directly to SpeechExec for transcription. The integrated Philips speech recognition software turns voice into text immediately.

” **Within no time, I receive a word document of my meeting minutes. As you can imagine, this is fantastic for me, saving hours of valuable time in a week.**

– Gordon McAlpine, Founder and CEO,  
The Sales Club

Dictation and transcription software

LFH4000 series

## Automated download

SpeechExec Pro allows authors and transcriptionists to automatically download all their dictations from their voice recorder straight into the software and route to the appropriate destination via their local network, FTP server, SpeechLive or email.

## Data security and back up

Real-time file encryption (256 bit) and secure file transfer grant only authorized individuals to access documents. The optional automatic backup function protects data against accidental loss.

## Integrated recorder and player

With the integrated dictation recorder, authors can record directly into their SpeechExec software. The software works perfectly with Philips SpeechMike dictation microphones and allows for quick and easy control of all recording and playback functions such as insert, overwrite and append. Function buttons can be individually programmed for added user convenience.

## Individual sort and filter options

Both author and transcriptionist benefit from individual sort and filter options to find dictations and documents even quicker and always stay highly organized.

## New task notifications

Transcriptionists can receive alerts whenever new recordings are assigned to them, making sure no important recordings are missed. These notifications appear on their screen in real-time in a discreet popup window.

## Seamless integration into SpeechLive

Philips SpeechLive cloud dictation workflow solution gives users constant file access via browser for greater flexibility and mobility. With SpeechLive, authors can dictate with their smartphone from anywhere and send dictations directly to their SpeechExec software. It also features a transcription service, where trained professionals quickly type up recordings for the author.

## Geared for speech recognition

Speech recognition software from Dragon can be seamlessly connected with solution. Whether the author is dictating directly into the software using a Philips microphone or uploading recorded files from a voice recorder, they will receive accurate speech recognition results which will help speed up their workflow.

## SpeechExec transcription player

The software comes with a convenient integrated transcription player with pause, fast forward and rewind options. Together with the configurable Philips foot pedal it allows for comfortable and quick transcription. Predefined templates can be used, so documents are automatically created with the appropriate header and footer, saving you even more time.

## Efficient workflow management

Easily monitor and manage the workflow between authors and transcriptionists. Recordings and the resulting written documents are automatically routed to the appropriate person for quicker turnaround times.

## Worklists and organization

Worklists help both authors and transcriptionists monitor their work statuses. They save time used for unnecessary status update communication between parties. Files can be organized into sub folders, assigned specific properties and comments and marked as urgent to help organize and prioritize tasks.

## Dictation and speech recognition software PSE4000 series

## Load in your own vocabulary

The integrated speech recognition software can learn new words and commands. It also allows users to load in their existing vocabulary lists and previously saved commands, ensuring high speech recognition accuracy is achieved right away.

## Integrated speech recognition

The integrated professional Dragon speech recognition software allows you to turn speech into text immediately using any Philips dictation recording devices and achieve superb audio quality, high accuracy, and easy hardware administration.
